Form Letter Plus Text	As a citizen who is concerned about the Earth's overall health, I am particularly worried about the damage that the coal industry has wrought on OUR Earth.	Form C
Form Letter Plus Text	As a physician concerned about the adverse effects of coal on public health, I'm encouraged to see this draft health impact assessment (HIA) for the Millennium (MBTL) coal export project.	Form C
Form Letter Plus Text	As a San Juan County resident, I am writing to While I remain concerned about the influence of Millennium on this HIA process, the data provided were striking.	Form C
Form Letter Plus Text	For the health of the country and it's citizens, we need to end coal as soon as possible.	Form C
Form Letter Plus Text	For the past two days, I have had a train running, parked in front of my house. The smell of diesel makes me sick to my stomach and the noise keeps me from getting a good nights sleep. Please take this HIA very seriously for my health and the health of my child as well as all those children and families that live along the rail line.	Form C
Form Letter Plus Text	However, this does not deal with any of the many negative impacts starting from the site of production and continuing all along the route to and into Cowlitz County. Surely these must be considered since the terminal has no reason to exist other than to accommodate the export of coal from Montana.	Form C
Form Letter Plus Text	I support the above comments although my personal concern is with areas outside of Cowlitz County. I have lived in Eastern Washington and Northern Idaho for 70 years. These trains have severe negative effects all along their route, I have seen and been stopped by them in Idaho, Eastern Washington (especially in and around Spokane and Spokane Valley), and along the Columbia River. In addition the side effects of their passage and processing will effect our environment much beyond their route and processing locations. When the coal is used it generates many noxious gasses as well as carbon dioxide. Many of these are damaging to human health and carbon dioxide is the most well known greenhouse gas. Our state is already suffering from human caused warming and this will make our forest and agricultural losses even worse.	Form C

Form Letter Plus Text	Mr. Fazio, I am writing to comment on the draft health impact assessment (HIA) for the Millennium (MBTL) coal export project. This document should provide the basis for clear recommendations from the HIA Steering Committee to prevent construction of the MBTL project, and protect the health of communities from the dangers of coal mining, transport, storage and export. It must be a tool to protect the health and safety of Cowlitz County residents from future projects that endanger our health and climate. I am concerned about the influence of Millennium on this HIA process, This would decrease accessibility of public services and increase wait times for emergency vehicles (p. 21). Cowlitz County and affected neighborhoods would be at greater risk of health effects than other parts of Washington (p. 15). Some people eating shellfish would be exposed to potentially toxic polycyclic aromatic hydrocarbons due to this project (p. 25).This is roughly on par with Washington State's total annual carbon dioxide emissions (p.20). Acknowledge that the significance of the draft HIA is limited due to the severely constrained geographic scope of the study area. The HIA Steering Committee must recognize and affirm that the unavoidable, significant, and adverse impacts identified in the final environmental impact statement by the Cowlitz County Hearings Officer cannot be mitigated and that the MBTL project must be rejected.	Form C
Form Letter Plus Text	Mr. SDD. The age of coal is nearly over; the sooner the better. Mr. SDD	Form C
Form Letter Plus Text	My family lives 1/2 mile from a railroad crossing and we already have coal trains coming through day and night...more would be unbearable!	Form C
Form Letter Plus Text	Please find the courage to do the right thing. While hard, it is the right thing to do and the only thing that matters in the long run. You can tell your grandchildren you were strong when it was important to their future. ***** *	Form C
Form Letter Plus Text	Protect our health and the health of our planet by prevention of construction of the Millenium coal export facility! The HIA, while not a legal tool, can help inform and strengthen future decisions. We totally appreciate this opportunity to comment on the draft health impact assessment (HIA) for the Millennium (MBTL) coal export project.	Form C
