Chip Sealing:

Drivers may encounter delays due to the 2020 chip sealing operations **Tuesday, July 28 on Beaver Creek Road in eastern Wahkiakum County** and **Wednesday, July 29 and Thursday, July 30 in the rural Longview area.**

Chip sealing is the primary surface type throughout Cowlitz County. Crews place a thin layer of oil, followed by specific rock chips. Sweepers ensure an even rock application while a roller packs the rocks into the oil. Within a week crews will return to sweep any excess rock that has not bonded to the oil surface, often multiple times. The treatment is applied approximately every seven years to keep roads in good quality. Chip seal is a cost-effective preservation treatment. Flaggers will direct traffic during chip sealing operations.

Roads scheduled for Chip Sealing (in approximate order) include: Beaver Creek Road (Wahkiakum County), Shermans Road, Fall Creek Road, Dragich Road, Stella Road, Diebert Road, Wohl Road, Haryu Road, Brock Creek Road, Ferncrest Road, Shamrock Road, Jackson Road, Grassetth-Poston Road, Eufaula Heights Road, Don Martin Road and Harmony Drive.

Chip sealing operations are expected to continue in the Longview area on Monday, August 3. Updated scheduling will be released next week. Subsequent schedules will include roads in the Kelso and Kalama areas. Maps by County area, of the roads to be chip sealed, are available on the Public Works web page.

Road Striping:

Drivers may encounter slow moving paint striping trucks next week on roads in Cowlitz County. The striping contractor releases the specific schedule of roads on short notice. Consequently, the road schedule is not available for the press release. The road areas will be posted to social media as they become available.

Motorists encountering the lead buffer truck are asked to wait until the last truck has passed before entering the roadway. Drivers behind, or travelling opposite of the painting operation, should not cross the paint lines. Per WAC 308-330-412, it is unlawful to drive across freshly applied markings. If vehicles do need to exit the roadway, they should proceed slowly at a 90 degree angle. Paint drying times will depend on weather, but it is generally dry within five minutes.

Pavement Overlay Status:

Drivers may encounter delays due to paving for the 2020 Countywide Overlay Project. Lakeside Industries, under contract with Cowlitz County, is scheduled to pave in the rural Kalama and Woodland areas next week. Paving operations are expected to require another two weeks to complete.

Roads scheduled for Overlay Paving (in approximate order) include: Little Kalama River Road, Butte Hill Road, Insel Road, Finn Hall Road, Fredrickson Road, Merwin Village Road, Mill Creek Road, Oak Point Road, Cathlamet Road, Bunker Hill Road, Beacon Hill Road, Norwood Drive, Pare Drive, County portion of Tennant Way and Maple Hill Road.

Flaggers will be present as one lane will be closed. Drivers should expect delays of up to 15 minutes between 7:00 a.m. and 6:00 p.m. in the active work zones.

White Road Culvert Replacement Project:

Advanced Excavating Specialists, under contract with Cowlitz County, have begun a culvert replacement project on White Road in Castle Rock. One lane will remain open for travel. Project completion is expected by mid-August.

Coyote Lane / Baxter Creek Bridge Project:

Legacy Contracting, Inc., under contract with Cowlitz County, are installing a bridge to replace a culvert to improve road safety and enhance fish passage at Milepost 0.16 on Coyote Lane in Castle Rock. One lane will remain open for travel. Project completion is expected in early November.

Rose Valley Road / Turner Creek Culvert Replacement Project:

Advanced Excavating Specialists, under contract with Cowlitz County, have begun a culvert replacement project between Milepost 3.75 and 3.83 on Rose Valley Road in Kelso. One lane will remain open for travel. Project completion is expected in early October.

Delameter Road Reconstruction Project:

C & R Tractor and Landscaping, under contract with Cowlitz County, has resumed work on the Delameter Road Reconstruction Project. This safety improvement project will replace culverts, widen travel lanes and modify curves and slopes from Milepost 0.90 to 2.33 (Cline Road to Melton Road).

The contractor is responsible for maintaining safe passage, with travel delays of 20 minutes or less, through the work zone during the construction project. Inquiries and concerns should be directed to their General Superintendent for the project: Jayson Johnson, C & R Tractor and Landscaping at (360) 577-8288.

Please use caution near construction zones and obey the directions of construction personnel and traffic control devices. Note: Both chip sealing and road striping operations are weather dependent. Moisture and temperature conditions can slow or postpone operations. Projected schedules are approximate.

Paint striping, chip sealing, overlay paving, culvert replacements and road improvements are scheduled throughout the summer. For up-to-date information please call the Department of Public Works at (360) 577-3030, or visit our website at www.co.cowlitz.wa.us/publicworks, or the Cowlitz County Department of Public Works Facebook page.
