Month End Commentary - February 2024

Yields jumped in February led by the three-year Treasury note which increased by 43 basis points to 4.42% while the two-year and five-year tenors both advanced by 41 basis points to 4.62% and 4.25%, respectively. The climb in yields was catalyzed by January’s muscular jobs report and reinforced over the month by inflation readings that showed the disinflationary trend faltering. Focusing on earnings, equities shrugged off the inflation reports and notched a fourth consecutive month of gains as the S&P 500 index charged ahead by 5.17%.

CPI beat expectations in January, advancing by 0.3% month over month (MoM) and 3.1% year over year (YoY) while core CPI advanced by 0.4% and 3.9%, respectively. The reading was heavily influenced by prices for core services, which advanced by an outsized 0.7% MoM led by costs for shelter and transportation. Economists subsequently revised their inflation forecasts higher as PCE later matched expectations accelerating by 0.3% MoM and 2.4% YoY while core PCE advanced by 0.4% and 2.8%, respectively. Again, the underlying trend showed the divergence between core goods, which have been in deflation for the past 8 months, and core services which continue to be the proverbial thorn in the side of a Federal Reserve seeking to restore price stability. While the January inflation readings may raise some eyebrows, one month of data does not make a trend and won’t alter the path of policy. It is also worth noting that January economic data is infamous for being noisy and prone to revision.

GDP growth for Q4 2023 was revised down on the second measurement to 3.2% however, one could argue that the revision displayed an even stronger composition of growth. Consumption was revised up while inventories were revised down. The strong spending that closed out 2023 hasn’t yet carried into 2024 as retail sales contracted by -0.8% in January versus an expected -0.2% while the control group, which excludes volatile items and feeds directly into GDP, retreated by -0.4% marking the first reduction since March 2023. The January report is certainly not immune to the noise mentioned above or seasonality however, the setback was broadly based and came alongside downward revisions to November and December sales data, potentially signaling that the consumer may be losing steam. With the Fed continuing to hold policy restrictive, any emerging downward trend in consumption is likely to garner attention as economic slowdowns are preempted by weakening consumer demand.

Spreads remain historically tight in most asset classes with little issuance in allowable names. We continue to observe better value and supply in supranationals for those entities that can invest in the asset class. Consequently, we advise clients to be patient when adding spread and to focus on maintaining duration near or slightly long relative to their respective benchmarks.

Treasury Curve Total Returns Last 12 Months

Treasuries	Total Return
3 month bill	5.22%
1 year note	4.80%
2 year note	3.66%

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
