Month End Commentary - April 2024

Volatility returned to financial markets in April after economic data released during the month acted as rain on the picnic of a Federal Reserve hoping to ease policy supported by cooling growth and inflation. Unfortunately for the Fed, most of the hard economic data received so far in 2024, hasn't been cooperative. Bond yields jumped during the month, led by the 5-year Treasury note which surged by 50 basis points to 4.72% and after five consecutive of months gains, equities underwent a correction with the S&P 500 pulling back by 4.2%.

The rise in yields began following March's non-farm payrolls report that continued to display strong labor growth and was further supported by the CPI release that showed prices had increased faster than expected for a fourth consecutive month. Core CPI went unchanged from February at a yearly 3.8% pace while headline CPI accelerated from 3.2% to 3.5% on the back of higher energy prices. Inflation amongst core services, a segment that the Fed closely follows, was driven by higher costs for auto insurance and medical care, both of which are unlikely to exert inflationary pressure on the broader economy. The trajectory of inflation so far in 2024 has not been what the Fed had hoped for, but inflation is procyclical, and if growth continues to slow as it appeared to in Q1, it could lay the groundwork for disinflation to reemerge.

GDP growth moderated in Q1 with the advance reading showing that the economy expanded by 1.6%, down from 3.4% in Q4 and short of expectations that had called for 2.5%. Consumption contributed 1.7% to the print while net exports and inventory decumulation both acted as a drag. Personal consumption remained buoyant, advancing by 2.5%, however, that figure fell short of expectations and is a pullback from the robust 3.3% reading in Q4. With policy held restrictive and a labor market appearing to come into better balance, waning consumption should not come as a shock. Welcoming for the Fed, job growth cooled in April with 175 thousand workers being added to payrolls missing consensus expectations and marking the slimmest increase in six months. What's more, average hourly earnings moderated for a fourth consecutive month advancing by an annual 3.9% and is the first sub 4% print in nearly three years.

The Fed met on May 1st with Chair Powell reiterating that they view policy as sufficiently restrictive to contain inflation citing that it needs more time to work and added that they need more evidence that inflation is returning towards 2% before they can cut interest rates. While corporate credit valuations remain historically rich, we are seeing some value in agency markets. We continue to believe that the current rate environment serves as an opportunity for investors to improve and anchor portfolio earnings for years to come and therefore recommend positioning portfolios neutral to long their respective duration targets.

Treasury Curve Total Returns Last 12 Months

Treasuries	Total Return
3 month bill	5.36%
1 year note	4.35%
2 year note	1.65%
3 year note	0.44%
5 year note	-1.87%

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
