Month End Commentary - April 2025

April's financial markets were defined by volatility, with tariffs fueling uncertainty and investor unease. The VIX Volatility Index sustained a level over 20 for the entire month reaching a 5-year high early in the month signaling a vast amount of market fear. Impressively, equities as measured by the S&P 500 Index clawed back nearly all of the 12% intra month drawdown, finishing lower by only -0.76%. Treasuries rallied, led by 2- and 3-year yields, both of which fell by 28 basis points to 3.60% while 10-year yields fell by only 4 basis points to 4.16% supporting a steepening of the yield curve.

Driving the market chaos was the President's "Liberation Day" announcement of reciprocal tariffs on trading partners across the globe causing investors to worry about heightened trade tensions and an escalating trade war that could cause undue harm to the economy. Immediately afterwards, the stock market sold off and the bond market rallied as investors sought safe havens to store capital but fortunately, financial markets received solace soon after the White House announced a 90-day pause on all tariffs excluding those imposed on China.

The first look at Q1 GDP growth showed the economy contract by -0.3% in what was the first decline since Q1 2022 and while the headline number appears concerning, looking under the hood tells a different story. The negative growth print was heavily influenced by an outsized drag from net exports as companies worked to front run tariffs to get ahead of duties placed on imports. Final sales to domestic purchasers, a useful metric for economic growth that removes the noise from trade and changes in inventory, went unchanged from the prior quarter advancing by a robust 3.0%. At this juncture, economists do not expect GDP growth for the current quarter to contract and instead anticipate a one-time boost in GDP as the Q1 blowout of the trade deficit unwinds. Instead, economists worry that growth may stall in the final quarters of 2025 where higher prices and supply shocks may negatively impact consumption and the labor market but for now, the economy is humming along. The April jobs report exceeded expectations as 177 thousand workers were added to payrolls and the unemployment rate went unchanged at 4.2%, supporting the Fed's patient approach to easing policy. On the stable prices side of the Fed's dual mandate, disinflation appeared to resume with core CPI falling for a third consecutive month to an annual 2.8% in March. However, inflation remains above the Fed's 2% target and the impact of tariffs has yet to be felt further supporting a patient approach.

Corporate credit and municipal bond spreads widened in April, nearing 3-year averages. As a result, we are maintaining a cautious approach to allocations, keeping them underweight to neutral relative to strategic targets. If spreads continue to widen beyond historical averages, we may adjust our allocations accordingly. Given the Fed's patient approach, rapidly changing trade policies, and uncertain fiscal outlook, we advise clients to manage their bond durations in line with their benchmarks, with a preference for a bullet structure to benefit from the steepening yield curve.

Treasury Curve Total Returns Last 12 Months

Treasuries	Total Return
3 month bill	4.88%
1 year note	5.21%
2 year note	6.41%
3 year note	7.54%
5 year note	8.38%

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
