## Cowlitz County | Total Aggregate Portfolio

### Month End Commentary - July 2025

The dog days of summer have arrived, and while stocks kept sizzling, fixed income took a breather. Bond yields pushed higher in July, led by the 2-year Treasury note which saw its yield climb by 24 basis points to 3.96% while the 10-year yield increased by 15 basis points to 4.37%. Equities extended their gains, climbing to record highs with the S&P 500 index returning a respectable 2.24% for the month.

With trade policy gaining some clarity – or at least markets building a tolerance to headlines, and the recent budget bill signed into law, focus has shifted back to the economy and monetary policy. Bond yields started their ascent early in the month following the release of stronger than expected June payroll reports and were later reinforced by inflation readings that showed the disinflationary trend stalling, leading traders to dial back their timelines for a Fed rate cut. Headline CPI accelerated from an annual 2.4% to 2.7% in June while prices excluding food and energy climbed from 2.8% to 2.9%. Notably, goods prices that are subject to tariffs heated up, implying that firms are beginning to pass through increased costs to consumers.

The first estimate for Q2 GDP growth showed the economy expanded at an annualized rate of 3.0%, which appears healthy on the surface however, the underlying details tell a different story. Like the GDP estimates released for Q1, the data was subject to a significant amount of noise from firms reacting to tariff announcements. Conversely, consumption trends show that the economy is losing momentum. Following a -0.2% contraction in May, real personal spending advanced by a slim 0.1% in June and is flat for 2025, marking the worst six-month period since 2020. Consumers have been wary, and the July jobs report may have provided some clues as to why. The economy added a meager 73 thousand workers to payrolls in July, and the unemployment rate ticked up to 4.2% despite participation falling. What's more, the prior two months were downwardly revised by a staggering 258 thousand positions.

The July jobs report was released just days following a Fed meeting where the FOMC left interest rates unchanged with Chairman Powell citing above target inflation and a solid labor market as support. Odds for a rate cut at the September meeting surged to over 90% following the release with market participants expecting that the Fed will need to provide easier policy to keep the economy afloat. Given expectations for slower growth and lower interest rates, we continue to advise clients to manage portfolio durations at or slightly above strategic targets, effectively anchoring earnings throughout the easing cycle.

### Treasury Curve Total Returns Last 12 Months

Treasuries	Total Return
3 month bill	4.57%
1 year note	4.15%
2 year note	4.07%
3 year note	4.23%
5 year note	3.60%

### Treasury Benchmark Total Returns In Month

Benchmark	Period Return	YTM	Duration (Years)
ICE BAML 90 Day Bill	0.35%	4.30%	0.24
ICE BAML 0-1 Year Treasury	0.30%	4.30%	0.51
ICE BAML 0-3 Year Treasury	0.06%	4.08%	1.42
ICE BAML 0-5 Year Treasury	-0.05%	4.03%	2.1

### Changes In The Treasury Market (Absolute Yield Levels)

Treasuries	07/31/2024	05/31/2025	06/30/2025	07/31/2025	1 Month Change	12 Month Change

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

**Questions About an Account:** GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

**Trade Date versus Settlement Date:** Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

**Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities:** GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

**Account Control:** GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

**Custodial Bank Interface:** Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

**Market Price:** Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

**Performance Calculation:** Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

**Amortized Cost:** The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

**Callable Securities:** Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

**Duration:** The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

**Benchmark Duration:** The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

**Rating:** Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

**Coupon Payments and Maturities on Weekends:** On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

**Cash and Cash Equivalents:** GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

**Account Settings:** GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

**Historical Numbers:** Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

**Financial Situation:** In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

**No Guarantee:** The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
